

My **COSMOS**

by **Ulla**

## MyCOSMOS

During the last few years I have been traveling extensively, mostly in America, but also in the far North of Europe, places like Iceland, Norway, the Orkney Islands, the Scottish Highlands and the Hebrides, where the Isle of Skye has become one of my absolute favourites. Being Scandinavian, my heart is always close to these high latitudes.

In the clear northern air, the stars and planets, even the galaxies, fill the night sky with shimmering jewels. Ever since my childhood in the Danish countryside, far from city lights, I have always loved the limitless wonder of space. Lately, this sense has been heightened by the images of deep space sent back to Earth by the Hubble space telescope, orbiting high above the atmosphere.

I am now busy with my space series: 'MyCosmos'. This series is my, at times, light-hearted interpretation of Hubble images! As always, I do not produce more than 12 paintings a year. The final number in the 'My Cosmos' series will be around 24.

Ulla Plougmand

A large, solid red heart is centered in the image. The text 'My COSMOS' is overlaid on the heart, with 'My' in a smaller font and 'COSMOS' in a larger font.

My COSMOS

**Birth of a Planet** 100 x 100 cm. Acrylic on Canvas

**Birth of Venus** 100 x 100 cm. Acrylic on Canvas
